

TRONIC CONCEPT

Surface Technology Equipment PVD - DLC & Nitriding Turnkey Solutions

TRONIC CONCEPT GMBH with its Headquarter in Düren, Germany was founded in 2013 as a highly specialized manufacturer of PVD and PeCVD Coating machines.

With over 50 PVD machines and Turnkey systems sold worldwide and the continuous development of new technologies and innovative coating systems, we are setting standards in the worldwide hard coating business. A team of highly experienced technicians and engineers is working with passion for the needs of our customers also offering service and consulting for PVD machines from different manufacturers.

For our team in Düren we are now hiring an innovative and reliable person which is eager to learn as:

Service Technician / Engineer for hard coating and Vacuum Technology (m/f/d)

- Maintenance and retrofits / updates on PVD Coating machines
- Installation and commissioning of new PVD Coating machines worldwide
- Phone- and online support for our worldwide customers
- Assembly and testing of vacuum components
- International travel with direct customer support and training

Qualification:

- Mechanical or Electrical qualification or craftsmanship
- Open for self-development and willing to learn, open minded
- Open for new worldwide contacts to our customers
- High willingness to travel worldwide
- German & English speaking
- Basic MS Office skills

Our Offer:

- The possibility to “move and create” something. Work in a young and international operating, family-owned company with start-up flair and a cooperative and motivated team.
- Challenging tasks with personal responsibilities and the possibility of your individual development
- High scaled initial salary (plus travel bonus and allowance in case of travelling), benefits like a job-bike, free drinks at the workplace in Düren, company supported retirement plan, team building events etc.
- An employer with a vision for the future and dynamic career opportunities
